## Technical Skills

### Overview

### Programming

Python

C

Golang

## Education

### 3rd year BEng., Radio Engineering and Computer Technology

Moscow Institute of Physics and Technology

2021 - Present | Moscow, Russia

### C language additional course

Moscow Institute of Physics and Technology

2021 - 2022 | Moscow, Russia

### Golang internship

Cyberprotect

Summer 2023 | Moscow, Russia

## Experience

Now my main programming language is Golang.

In the summer of 2023, I did an internship at the company Cyberprotect, where I wrote a REST API service for pumping large files, where I added authorization using jwt tokens and working with a database (PostgreSQL).

I also have my own projects on go, which are presented on my github. For example, a backend for a dating app where I use the Gin framework to implement some features.

In my 1st year, I attended Ilya Dedinsky's C programming courses, where I got acquainted with the basic data structures and algorithms that are used in programming. I implemented my hash table with dynamic memory allocation using the c language, also implemented my version of the Akinator website and many other projects that are presented on my GitHub

I am very interested in Python. I have some projects on my Github where I used this language. I've already used some Python tools: pandas, numpy, matplotlib, seaborn, scikit-learn, pyTorch. Also I am interested in development in C and Go languages.

## Additional information

- I have an intermediate level of English. I understand almost everything that somebody says to me and I can express my thoughts in English.
- I am a very sociable person, I like to meet new people.
